

I CLAIM:

1. A cooler, folding stool and mounting means combination for detachable mounting of said cooler and folding stool to a carrier mounted on a vehicle frame, comprising:
 - 5 a folding stool having a pair of pivotally interconnected rectilinear frame members having a flexible seat means secured therebetween, adapted to be moved between an open operative position wherein said seat means is substantially planar and a closed inoperative position in which said rectilinear frames are in substantially parallel overlying relationship;
 - 10 a substantially rectangular cooler adapted so as to fit under said seat means and between said pair of interconnected rectilinear frame means when said folding stool is in said open position;
 - mounting means, mountable on said carrier and adapted to releasably engage a portion of each of said pair of rectilinear frame members when said stool is in
 - 15 said open position, so as to hold said folding stool and said cooler on said carrier; and
 - tensioning means to urge said rectilinear frame members into releasable engagement with said mounting means.
2. A combination as claimed in claim 1, wherein said mounting means
 - 20 comprises a pair of spaced apart parallel members, each having ends adapted to releasably engage a respective said portion of each of said pair of rectilinear frame members.

3. A combination as claimed in claim 2, wherein said pair of spaced apart parallel members is mountable transversely on said carrier.
4. A combination as claimed in claim 2 including releasable means to secure said parallel members to said carrier.
- 5 5. A combination as claimed in claim 1 wherein said tensioning means is selected from adjustable strap means and an elastic cord means.
6. A combination as claimed in claim 1 in further combination with a vehicle upon which said carrier is mounted.
7. A combination as claimed in claim 6 wherein said vehicle is selected from
10 the group consisting of pedal driven vehicles, motor cycles, all terrain vehicles and snowmobiles.
8. A combination as claimed in claim 7 wherein said pedal driven vehicle is a bicycle.
9. A combination as claimed in claim 8 wherein said mounting means is
15 mounted transversely on said carrier which is mounted behind a seat of the bicycle and over a rear wheel of the bicycle.
